PROGRAMME AND REGISTRATION FORM

This course has been designed to be suitable for anyone with an interest or a need to know more about the offshore marine operations, in particular ...

Young engineers, managers, business development executives involved in the offshore industry

New entrants from other industry sectors

Those within the sector seeking to acquire a greater awareness of this segment, or simply looking to update their knowledge

Those outwith the sector seeking to gain information on how the offshore marine sector works

By using key supply and service companies the modules are presented by the front line industry players giving the delegates the most up to date information available.

This is a classroom based course but sessions will be interactive with many opportunities to put questions to key individual presenters from leading industry players. Part of the course will be delivered at the Aberdeen Maritime Museum, allowing free access to the Museum's wealth of exhibits.

Offshore Marine Operations Awareness

PROGRAMME

DAY 1

08.30

Welcome

General Introduction to Offshore Marine Operations

- History of the industry
- Use of vessels in the lifecycle of an offshore development
- Importance of the types of vessels to different operational stages in the life of a field
- Overview of the types of offshore installation and stages of operation
- Seismic exploration
- Drilling; well appraisal; anchor handling
- Construction
- Production and operations
- Decommissioning and abandonment
- Supply and re-supply
- Differences between shallow water operations and deepwater operations
- Differences between North Sea, Gulf of Mexico and West Africa operations

12.30 – 13.30 Lunch

Overview of the Market and Commercial Aspects

- Relationships between ship owners and charterers
- The process of chartering and brokering vessels – how the industry works
- What drives the market
- Market analysis: number and type of vessels operating; current major players in the market
- Economics: development costs and day rates
- Future outlook

Legislation, Health, Safety and Environment

- Introduction of UK legislation and European Directives
- Its application to offshore installations and operations
- The role of HSE
- Overview of the requirements of health safety and environmental regulations
- Safety cases
- Accident reporting
- Case histories

16.45 Close

19.00 Course Dinner

DAY 2

08.30

Management of Offshore Operations

Pre-Operations

- The players and interfaces
- Selection and audit
- Project roll-out
- Safety management
- Technical preparation

Operations

- Pre-mobilisation issues
- Audit issues close-out; risk assessment; procedures approval; bridging manual; roles & responsibilities; emergency response
- Mobilisation
- Vessel facilities; personnel; third party equipment; safety management security; certification; control/co-ordination
- Operations
- Roles and responsibilities; daily progress reporting; work scheduling; information transfer; safety; logistics

Post operations

- Demobilisation
- Technical and commercial close-out
- Safety review
- Lessons learned ('SIREN')
- Incentives and rewards

Operations and Technical Equipment

This session will provide details of the relevant use of marine vessels during the life of an offshore field; an explanation of mobilisation issues; operation of the relevant vessels; describe the nature of equipment used, not only operational equipment but essential vessel equipment fit; explain the importance of the demobilisation process; and give case study examples.

Construction

- Pipe and umbilical lay

13.00 – 14.00 Lunch

Well Intervention

- What is Well Intervention
- Why intervene
- Types & Methods
- Interfacing & Control
- Challenges

ROV Operations

- ROV operations
- AUV operations
- Intervention tooling (vessel needs)

17.00 Close

DAY 3

08.30

Operations and Technical Equipment (Continued)

Construction Support

- Diving operations from vessels
- Diving capabilities

Construction

- Heavy lift
- Trenching
- Decommissioning

12.00 – 13.00 Lunch

Exploration and Survey

- Seismic exploration
- Seabed survey
- Surface and subsea navigation

16.00 Close
